Mayor Ireton: 'We are a city transformed'

BY JOHN TULLY Staff Writer

"I'm proud to report that the state of our city is transformed from reactive to proactive in addressing the needs of Salisbury," said Mayor Jay Ireton, Jr. last Thursday, summing up the tone of his state of the city address.

up the tone of his state of the city address.

He then began a "lightening round" of achievements from the past two years. Such accomplishments included the Salisbury zoo raising almost \$3M with a conscious nod to Wicomico County students who helped raise more than \$31,000 on the zoo's behalf, the construction of the Naylor Mill lift station, touted as both spurring job growth and, having been built well under budget, saving nationwide taxpayers around \$500,000, and other strides in environmental concern, community outreach and city beautification.

"Salisbury is a safer city than it was two years ago," said Ireton, highlighting steps taken to reduce crime throughout the city, including a 21.9 percent reduction of part one crimes, a 85 percent plunge in homicides, a 64 percent drop in robberies and an 18 percent reduction in assaults, all over the past two years.

The mayor went on to lay out plans to institute programs and implement the latest technology in order to ensure efficient police action in reducing crime.

"Since I live off campus and walking is my main way of transportation, I feel secure and encouraged to go about my way, knowing that the police are...keeping Salisbury safe," said freshman Arielle Champagne.

Ireton shared proposed initiatives to provide incentives to developers that he hopes will build up the down area of Salisbury.

"With coordinated effort and commitment,

downtown will capture real market demand for development," said the mayor, as reported by The Daily Times. "Even modest amounts of county and regional growth will translate into real development potential."

Such incentives include more inviting tax exemptions for businesses, a 50 percent reduction in the water capacity fee of the city, alterations to the paving policy of the city which would allow road modification to only apply to half of the road, reducing costs for developers, plans to develop and surplus existing parking lots, and, given the costs of the current equivalent dwelling unit—about \$8500 for water and sewage utilities—making downtown Salisbury an EDU-free zone.

"I want to stop watching developers go to Delaware," said Ireton, who anticipates a 300 job increase, an 500 unit gain in housing, a 750 boost in resident population and 100,000 com-

mercial square footage increase in downtown Salisbury by the year 2020.

"These ideas are as sensible as they are desired on the part of the business community," said Salisbury's Daily Times editorial on Sun-

Gay.

Former SGA President and graduate student Julia Glanz, who introduced Ireton at the address, appreciated his blueprints for building up the downtown, but said, "I would have liked to see his vision around other parts of Salisbury."

"I was hoping to hear about local housing laws, and if any changes were planning to be made," said Champagne, but remained optimistic about the future of Salisbury.

Ireton echoed this optimism, saying proudly, "We are a city transformed for our people."

Later hours planned for campus

BY COREY NETHEN Staff Writer

The early bird may get the worm, but most college students are latenight binge eaters, frantically pecking into the ground for some kind of academic nourishment into the eleventh-hour.

Fear not procrastinators, because starting March 1 Blackwell Library, Fireside Lounge and the academic buildings will all run on new operating hours.

Blackwell and Fireside will soon close at 2 a.m. Sunday through Thursday. The academic buildings will close at midnight throughout the week. Devilbiss will be closed on the weekends.

Fireside Lounge's hours encourages a study break and change of environment for hard-working students.

"I always thought TETC's 24-hour lab hours during finals were a great idea," said junior Kelsey Hovermale. "But finals week isn't the only time that students are studying at late hours at night."

A shuttle service will run parallel with the new hours.

Inside Blackwell there will be a security guard to ensure students' safety from 12 a.m. to close. The focus of the new hours is study

Academic buildings: Mon-Fri: 6am-midnight Sat: 7ammidnight Sun:11midnight

Blackwell:
Mon-Thurs: 8am2am Fri:8am-10pm
Sat:10am-8pm
Sun: 11am-2am

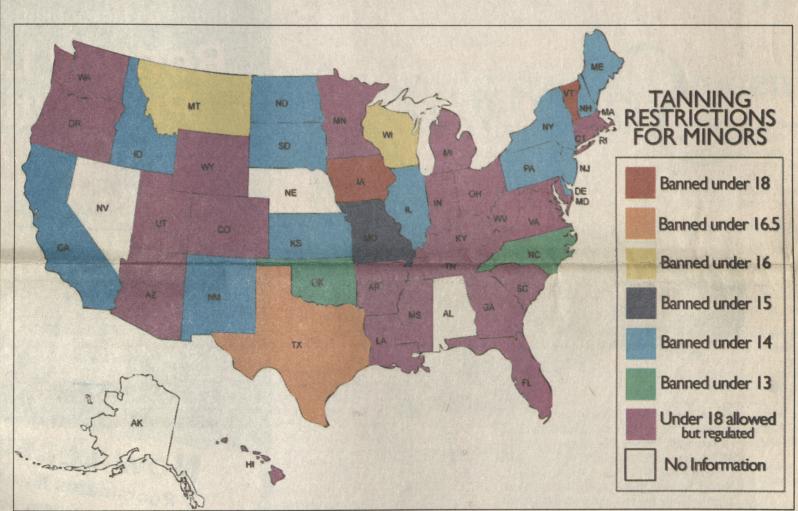

Fireside:
Mon-Thurs: 8am2am
Fri-Sat: 8am-midnight Sun:11am2am

time; therefore less staff will be working the late shifts.

The new closing times aren't a solution to everyone's problems though. Henson Science Hall's hours will actually be cut, preventing access to several tools vital to some majors.

Tan Ban

MD considers banning tanning for minors.

BY AMANDA LIBBY Staff Writer

In a world where tanning is just as important as going to the gym and doing laundry, a new bill in Maryland could halt throngs of teens in their quest for that Snookiesque glow.

Maryland Senator and cancer survivor, Jamie Raskin, presented a bill Feb. 9 to the Senate Finance Committee that, if passed, would effectively ban the use of indoor tanning beds to minors.

beds to minors. In 2005, 2.3 million adolescents used indoor tanning devices, according to the Journal of the American Academy of Dermatol-

ogy.

Local tanning salon Beach Fever owner, Melanie Gladden, claims they will most likely not be affected by the ban because only 1% of their users are under age 18. Those customers are required under current law to have their parents' permission before employing indoor

tanning services.
Gladden believes it is the parent's responsibility to decide what is best

for their children.

"As a parent, I'm going to go into a facility where my daughter is going to tan and check it out and see if there are professional people there," Gladden said.

California is currently the only state that bans indoor UV tanning beds for teens under age 18, according to the National Conference of State Legislators. Other states including Delaware, Illinois, and Maine ban tanning for those under

the age of 14.

"I can understand the reasoning behind the ban," said senior Kara DeBoy. "Who wants to be orange? Indoor UV tanning can be dangerous for young girls because it can damage reproductive organs. But its people's right to do what they want to do with their skin."

Studies show that indoor tanning poses significant health threats for youth in America. The Journal of the American Academy of Dermatology says that numerous studies have documented an association between the use of indoor tanning devices and an increased risk of skin cancer, especially in young women.

Despite the dangers of tanning, some still believe that the bill in-

fringes on an individual's freedom of choice.

of choice.

"I am totally against the government taking the right away from a girl's parent to allow her to tan,"
Gladden said.

PACE to register students to vote

BY MALLORY LENGEL
Submitted Article from PACE

bubmitted Article from PACE

Despite the lack of visible reminders that normally litter yards, sidewalks and freeways, this is indeed an election year. Primary Elections are just over a month away, on April 3, and the General Elections are November 6.

This year, in an effort to promote student participation in the upcoming presidential election, the Institute for Public Affairs and Civic Engagement and the Presidential Citizens Scholars are hosting voter registration every second Wednesday in The Commons. Students in the scholars program have been trained to register voters at tables during high-traffic hours.

Students often miss a crucial opportunity to affect change around them. Citizens in the 18-24-year-old range historically have a much

lower voter turnout than the over 25 sect. According to The Center for Information & Research on Civic Learning and Engagement, from 1972 until 2008, on average, between 35 percent and 53 percent of citizens aged 18-24 voted in presidential elections, whereas 60-70 percent of citizens 25 and older voted.

PACE is a non-partisan institute committed to teaching political engagement and promoting civil discourse. PACE's goal for this semester is to reach out to and register 100 percent of the student body to vote.

With hot topics that so strongly affect the younger set of voters, such as abortion, contraception, gay marriage and the floundering economy, it is even more important for the 18-24-year-old group to voice its opinions.

Take the issue of our dismal

economy; even if you are not concerned with the other issues, all students are concerned about the job market. Whether you're trying to make a little extra cash with a parttime job while you're in school, or you're graduating and trying to break into your career field, this dismal economy offers no hope. Students must put their vote toward someone they believe will improve the economy, and consequently, the job market.

It is time for the 18-24-year-old populace of America to make its voice heard. Although students have many reasons for not voting, most of them don't realize it's easier than they think.

"I can't just go home to vote on any random Tuesday. I have classes and a job," said SU junoir Kristina Letcher.

BY ABIGAIL COLBY Party Girl Problems

With spring, tailgates and other warm weather festivities almost upon us, it is important for every college student with a social life to master one pertinent party skill: the day-drink.

While those who are unfamiliar may write off daytime drinking as the same as nighttime drinking, many of us have learned the hard way that they are two very different ball

While going out at night comes with hours of time to prepare yourself, day drinking usually comes at you fast, requires commitment, strategy and perseverance, and perhaps knowing the challenges that await you will help everyone in making their daytime dreams come true.

HAVE A SOLID GAME PLAN: Are your second or third locations in walking distance or can someone get you when it's time to move on? What time are things getting started? If there's a game, what time does that start? These are things to straighten out while you're still in a coherent mindset, as it's easy for the relaxing atmosphere of a springtime soiree to cause you to forget what your plans are. However, with communication beforehand and a committed afternoon crew, you'll be able to maximize your day-drink experience.

COME PREPARED: Snacks and a firstaid kit are a must for any daytime activities. Nothing kills a laid-back vibe quicker than a grill burn or someone spraining their ankle on a cornhole board. Instead of being remembered as the guy or gal who failed miserably at jumping off the deck, you'll be the one remembered for saving the day-drink with your stealth preparation and readiness

SCHEDULE IN NAPTIME: Even the veterans of the day-drink community need a rest period before starting up the evening round of drinking. After hours of living it up in the sun and embracing the atmosphere, your body will need a break. So grab a friend, find a hammock and snooze off the booze for an hour; you'll be happy you

PACE YOURSELF: The single most important rule of day drinking, and it relates back to the tortoise and the hare concept. Understand the sun and alcohol combo is one to be enjoyed in moderation continuously throughout the day. You know your friend that washed down his beer and cereal with a few handle swigs at 10 a.m.? Yeah, he's also the one passed out in the bathroom by noon. Don't let the day-drink win.

Day drinking: A Defensive driving on Camden

Editorial Editor

Driving down Camden Avenue requires the kind of quick-reaction motor skills that video games

teach kids. People on, near or around Camden have been proven to do just about anything at any given time. Being overly cautious is the only

way to deal with it. Driving out onto Camden from a side street shouldn't be that hard. The only thing the driver needs to remember is that the road is small, so your car may be in the opposite lane than the one you intend to drive in for a brief time when you

turn onto the road. Most people would take this knowledge and make sure there were no cars coming in either di-

Ishmawiyl Claiborne: Study abroad success

BY AJIA ALLEN

Studying abroad is an essential undertaking in a college student's

It's not only a great opportunity, but also allows for the mingling of cross-cultural differences. Salisbury University Alumnus Ishmawiyl Claiborne, class of '07, now frequents China for business purposes after he studied around the world.

He shares his experiences abroad, once as a student and now as a business man, with African-Americans and all students interesting in studying in other

Claiborne distinctly noted the typical reactions toward him as an African-American male walking the streets of China's capital. His experiences ranged from typical culture shock to inquisitiveness or even

Claiborne's experiences con-

firm that studying abroad can serve to increase understanding of different customs. Globalization is on the rise, and studying abroad could very well become mandatory in the near future.

Claiborne lives a daily life dedicated to cross-cultural engagement. He recognizes and understands the necessity for minority students in the U.S. to utilize opportunities to travel to other nations.

SU is an advocate for international cultural inclusion. There are many opportunities to study abroad in various countries. SU also welcomes people of other nationalities to campus as it hosts foreign exchange programs.

"I am inspired and would like to inspire other African Americans," Claiborne said, encouraging minority students to take advantage of

It is safe to say all students wish to succeed in the near future. The successful communications student will seek to broaden his or her cultural knowledge. The successful business leader of tomorrow will take initiatives to expand beyond national boundaries. Any student from any major can find a benefit in studying in another country.

When the opportunity allows,

campus

Housing and Residents Life Director Dave Gutoskey, who has worked for the university for 18 years, said the residence buildings were designed to stay for about five

"The buildings themselves were extremely popular," Gutoskey said. "Because at the time, it was the only space on campus that had single rooms, so it always filled."

The 14 residence buildings house 140 students. Each room has its own heating and air conditioning unit. Gutoskey said that Dogwood is still a popular place for students to live, noting that the buildings are safe and in good shape. "Last year, we put a couple hun-

dred thousand dollars of changes into them," Gutoskey said. "We renovated the bathrooms, replaced the floors (and) took care of some doors that need to be taken care Junior communication arts major

Leslie Roane is satisfied with living in Dogwood. The single room set up is perfect for what she calls her only-child syndrome. "I love Dogwood because I have my own space, and I don't have to

worry about other people and sharing my space," Roane said. Sophomore social work major Dwayne Demby said he loves living in Dogwood. If there were any changes that could be made to Dogwood, he said he would prefer

Roane said she would prefer thicker walls, a closet, and would like to get rid of the heating unit in her room.

"I had a problem last year where the unit leaked, and I had a mold and mildew problem my first month and a half," Roane said. Gutoskey said that hopefully in the near future, Dogwood would be taken down, but the main focus

is to take care of the academic

needs of the university. "When you take into consideration of all the needs of the university and the master plan, certainly we addressed the academic needs right away." Gutoskey said. "I think it may be around for another three or four more years.

inside floor manager Kristen camera perfectly. Camera operator Tal Carmel follows suit and zooms in on the host.

Behind the booth, producer and vice president of SU TV, Steven Jenkins runs the show. "Give him a little more headroom there, Tal," Jenkins said. "That's it,

Media productions student Jason Smith taps the sound levels ever so slightly, as he explains to a new

Classical guitarist Danielle Cumming, right, and tenor John Wesley Wright, left, performed musical works from the Renaissance and 20th Century in Thursday's "Guitar in the Gallery" concert held in the Fulton Hall Art Gallery. Cumming accompanied Wright in a number of Spanish, English, and American pieces and played several solo numbers including "Cancion del Emperador" and "Milonga del Angel."

A new Maryland Senate bill would require welfare recipients to undergo drug testing.

BY SARAH WOODS Health Columnist

Senator J. B. Jennings' Senate Bill The problem is that people tend to 287 would require individuals to submit to a drug test in order to receive certain state benefits.

Specifically, the bill would require 'individuals applying for or receiving temporary cash assistance benefits under the Family Investment Program to comply with eligibility requirements related to drug testing; authorizing temporary cash assistance benefits that have been terminated to resume under specified circumstances; requiring an addictions specialist to notify the Family Investment Program case manager if an applicant or a recipient does not complete drug testing.

Bill 287 is only specified for temporary cash benefits, and a positive drug test would not suspend benefits such as medical assistance and food stamps.

Several other states, most recently Virginia and Oklahoma, have submostly backed by Republican politi cians. Democrats claim that requiring welfare recipients to submit to drug testing is racist, discriminatory

Women's bball falls to York, finishes season 15-11

BY MARK ECKARD Staff Writer

After a monumental first round win over Stevenson, Salisbury University's women's basketball team traveled to take on York College Thursday night at Charles Wolf Gymnasium in the Capitol Athletic

Conference semifinals. The Sea Gulls battled back from a 22-point halftime deficit and cut the Spartan lead to four at 49-45, with 5:57 remaining on a Whitney Kolakowski layup. But they ultimately fell 64-51.

The Sea Gulls were led by Anna Hackett with 13 points while Nicole Sisco and Cinthia Ruiz chipped in with 12 and 11 points, respectively. Katie McGahagan added 8 points and 8 rebounds.

The first half did not start well for the Sea Gulls, with York opening up an 18-3 lead with 11:39 left in the half on a Brittany Hicks jumper. SU was able to cut the lead to 10, however, on an Anna Hackett basket. The Spartans answered right back with a three-point-play from Kristen Haley to extend the lead to 13 and went on a 14-5 run to end the half, leading 39-17 at the

The Sea Gulls were led in the half by Ruiz with 6 points while Sisco and McGahagan each contributed four in the frame.

SU came out inspired in the second half going on a 12-0 run starting at the 10:44 mark with a Hackett jumper to cut the lead to 49-35. In that stretch, the Sea Gulls were fueled with a balanced attack by senior K.C Curran's threepointer and a Sisco turnaround, off the glass lay-in.

"I feel that our defense really picked it up in the second half," said Head Coach Kelly Lewandowski. "We were getting stops that we weren't getting in the first half and then capitalizing on

those stops at the other end." After Kolakowski's layup to cut it to four, York's April Sparkman hit a three from the left corner and then a layup to push the lead back to nine. The Spartans were never threatened from there, with several free throws being made to extend the final margin.

"York is a very good team that played four starters that started last year on a championship team," Lewandowski said. "Our outside Alyssa Hardesty. shots weren't falling so we needed Earning the win was sophomore to rely on our drive which decreased our assists."

The Sea Gulls finished the 2011-12 season, the first season under head coach Lewandowski, with a When it was all said and done, 10 record of 15-11, 11-5 in the CAC. This marks the final contest in the fine careers of seniors Curran and Meg Dunn. This also marks the final game for senior Milan Dry who tore her ACL on Feb. 8 in a win over St. Mary's.

Sophomore goalie Alex Taylor had a solid day between the pipes with 11 saves, good enough for his

Sea Gulls fly past Roanoke, 19-2

BY JOSH BOND

Staff Writer

The No. 6 Salisbury University women's lacrosse team opened up its regular season by defeating Roanoke College, 19-2.

The win gave SU its fifth consecutive victory against the Maroons. From the moment of the opening faceoff, the Sea Gull's offense was firing on all cylinders. SU took control of the game early by scoring twice during the first two min-

utes of regulation. "Usually we come out a little shaky," said junior attack Katie Bollhorst, who scored the first goal of the game. "We played as a unit

which was the most important

Bollhorst also added two more goals for the Sea Gulls and finished with a game-high of five assists. During the first half, SU completely dominated the Maroons.

Roanoke was held scoreless until the 24th minute. By that point, the Sea Gulls had already lit up the scoreboard with 10 goals. SU's high-powered offense finished the half with 13 goals op-

posed to Roanoke's lone score. The offensive attack was led by Bollhorst and senior midfielders Carrie Bray and Allie Wheatley.

"Our players were riding which caused turnovers," said Head

more opportunities for offensive scoring plays." The large lead at half time gave Nestor an opportunity to provide playing time to all his players. Even with most of the starters sitting out in the second half, SU managed to outscore Roanoke 6-1.

For the entire game, the Sea Gull's defensive played relentless as they allowed the Maroons to take a dismal 12 shots and only score

Coach Jim Nestor. "It allowed
